

May 11, 2018

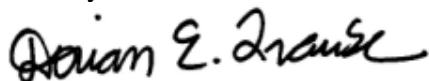

Vice Provost Graddy and Professor Rosenbloom:

This the year the Mentoring Committee was asked to pilot a program for providing technical assistance to academic units to assist them in developing formalized mentorship plans. Attached is the final mentoring report for the year, including reports from the hree pilot programs.

For the past two years, the membership of the mentoring committee was not established until November of the academic year. We have generated significant traction this year through a network of highly productive sub-committees. We would like to request that the membership of the Mentoring Committee be determined by September 2018 so that we may capitalize on our current efforts and quickly engage in future activities.

Thank you for the opportunity to serve as chair of this great committee. Please let me know if you have any questions about our final report.

Sincerely

Dorian Traube, PhD
